Offer

NANOMEDTAB - FREE-OF-CHARGE MENTORING PROGRAM TO ACCELERATE PROMISING HEALTHCARE PROJECTS TO THE MAR

nanomedTAB – Translation Advisory Board (www.nanomedtab.eu), is a free-of-charge mentoring program to assess, advise and accelerate promising healthcare projects (previously only nanomedicine, now extended to the broad medicine spectrum) to the market, based on the diverse experience of top skills industry experts (<http://nanomedtab.eu/index.php#experts>).

With a total of 78 applications from 19 countries in EU and beyond, half of them currently benefiting from coaching, nanomedTAB is helping these projects to get to commercial application faster and more reliably.

After each round of applications (made through www.nanomedtab.eu/?apply) the selected projects are invited to attend a TAB-In Session, a series of face-to-face meetings with our

translation experts, taking place regularly, throughout Europe. For those who aren't able to attend our suggested locations/events, a Skype call, in a suitable date, can be arranged.

COOPERATION OFFERED
